

THE COLEMAN BULLETIN

VOL. IV. NO. 21

COLEMAN, ALBERTA, OCTOBER 14, 1915

\$1.50 PER YEAR

Early Fall and Winter Goods

are now in stock ready for your inspection. Ladies' and Children's Coats—“The Roger Garments.” New Styles, New Cloths. No two alike. Prices \$7.50 to \$30.00. Come early and make a selection. Ladies and Children's Underwear, both combination and separate garments.

We Sell the Watson Brand—There is none better

KNITTED WOOLENS

Received this week a large shipment from The Monarch Knitting Co., consisting of Men's Sweaters and Sweater Coats, Boys' Sweaters and Sweater Coats, Ladies' Sweater Coats, Girls' and Misses' Sweater Coats, Ladies' and Misses' Skirts, Hockey Caps and Toques. Large assortment of styles and colors in all these lines.

VELVETEENS

Velvets are very popular this season; also somewhat scarce. We were fortunate in securing all the desirable shades early in the season and offer them at the old price—60¢ a yard.

BLANKETS

Soft and warm, cosy and comfortable. Grey Union \$2.90, and up to the ten pound All-wool Hudson's Bay at \$9.00. Every number and price is good value.

COMFORTERS

Large size, 72 x 72 inches, filled with good clean cotton, covered with silkaline or satine. Price \$1.90 to \$4 each.

CARSS MACKINAW CLOTHING

These goods are guaranteed all-wool and are without exception the best mackinaw goods in the market. The prices range from \$5 for a plain jacket to \$10 for a Check Norfolk, strapped and belted with shawl collar. Green and black, brown and black, grey and black.

MEN'S and BOYS' CAPS

Full range. Black, blue and colored tweeds and worsteds, with wool or fur band. 75¢ to \$2 each.

FELT BOOTS

Full assortment now in stock. Laced boots and house slippers for men, women and children.

Child's Knitted Suits, Cardinal, Brown, Fawn, \$2.00.

Men's "Invictus," the Best Good Shoe. We still sell these at six dollars a pair, and they are without exception the most satisfactory and the best value that can be had.

Full range of Men's Working Boots.

GROCERIES—Complete stock of choice fresh goods.

FRUIT and VEGETABLES—Our first car of B. C. Potatoes and other Vegetables will be in this week. We expect the stock will be best quality and the price low.

This car also contains 100 boxes No. 1 Fancy Apples—Jonathan, Roman Beauty, McIntosh and Spy. Buy your winter apples now. Prices will be higher.

W. L. OUIMETTE

THIS MAY BE

Your Last Chance

to get a supply of Preserving Fruit and Pickling Vegetables. The supply will soon be exhausted and we cannot guarantee to get what you want after next week. We have Toky Grapes now and expect Ontario Grapes on Saturday or Monday. 20c. lb., 2 lbs. for 35c.

PEACHES—Freestone—per case	81.5
PLUMS, per crate	.95
CRAB APPLES, per 40 lb. box	1.75
PEACH PLUMS, per crate	1.05

COLEMAN BRANCH RED CROSS SOCIETY TO HOLD FLAG DAY NEXT THURSDAY

The following cable has been received by the Lieutenant-Governor of all the Provinces of the Dominion from Lord Lansdowne, President of the British Red Cross Society:

"I beg to inform you that the British Red Cross Society and the Order of St. John in view of the growing demands upon their resources both in France and in the near East, have decided to make an appeal throughout the Empire, by street and other collections, upon one day, which has been fixed for the 21st October. The money received from this appeal will be devoted entirely to relieving the sufferings of our wounded soldiers and sailors from home and overseas at the various seats of war from all parts of the King's Dominions."

"I beg to inform you that the British Red Cross Society and the Order of St. John in view of the growing demands upon their resources both in France and in the near East, have decided to make an appeal throughout the Empire, by street and other collections, upon one day, which has been fixed for the 21st October. The money received from this appeal will be devoted entirely to relieving the sufferings of our wounded soldiers and sailors from home and overseas at the various seats of war from all parts of the King's Dominions."

"We have already received generous assistance in our work, but with the increase of British and overseas forces at the front there is a corresponding increase in our expenditures, and we shall be truly grateful to you if you will help us by organizing an appeal, sending proceeds to

us for the object which I have named."

"I shall be greatly obliged if you will communicate the following to your Government."

"Their Majesties the King and Queen and Her Majesty Queen Alexandra are giving us their gracious patronage, and I trust that you will be able to see your way to help us."

In response to the above, a meeting of the executive committee of the local branch was called and it was decided to hold a flag day on Trafalgar Day—Thursday, October 21st. The town has been divided into districts and two ladies will canvass each district. The flags will be sold for 10c. each, but if any person wishes to give more it will be gratefully received.

The secretary acknowledges with thanks a cheque for \$7.40 from Mr. Harry Clark, being the proceeds from the sale of fruit, etc., used in the harvest thanksgiving service at St. Albin's church.

Sewing meetings as usual every Friday afternoon from 2.30 to 5.30 o'clock.

OBITUARY

The funeral service of the late James Kilgannon, who died on October 8th, was held in the Holy Ghost church, Coleman, on October 11th at 10:30 a.m. High Mass was celebrated by the Rev. F. Crociata, pastor, and the sermon of the occasion was preached by Rev. E. Beaton, pastor of Bellevue. Mass was sung by Miss B. McKinnon, from Frank and Mrs. Bond from Blairmore, organist. The church was well draped for the occasion and the services was largely attended by the numerous friends and relatives of the deceased. The funeral arrangements were in charge of Mr. Davies. The deceased was 42 years of age and leaves a widow and five young children to mourn his loss. Amongst the relatives present were Messrs. W. and D. Kilgannon, brothers of the deceased, who cordially extend thanks to the officers and members of the local branch of the U. M. W. of A. for the sympathy and assistance rendered in the funeral arrangements.

PATRIOTIC DANCE

The Patriotic Society of Bellevue is giving a dance in the Workers' Hall on Monday evening, October 15. As the entire proceeds are to go to the Patriotic Fund it is hoped there will be a large attendance. Gentlemen \$1. ladies bring refreshments.

A Good Day's Shooting

has often been entirely spoiled and marred because the sportsman did not pay sufficient attention to his supply of ammunition, and carried inferior goods.

Good shooting is not possible without Good Shells. Every man who ever pulled a trigger recognizes this fact.

When you go on that shooting trip you can avoid such troubles by using any of the following makes of Loaded Shells:

Remington U. M. C. Nitro-Club
Peters' Target
Peters' Referee
Dom. Cartridge Co's Sovereign

We carry all these lines. We also have a complete stock of Ball Ammunition of every description.

H. G. GOODEVE CO., LIMITED

VALIANT SONS OF THE DOMINION UPHOLD BEST BRITISH TRADITIONS

AN AMERICAN WRITER PAYS A FINE TRIBUTE

Will Irwin Tells of the Heroic Conduct of the Raw Canadian Troops, and of the Fortunes of War which Brought Them a Supreme Test of Valor

Writing in the New York Tribune, Will Irwin, who has won an international reputation for his work in the present war, speaks of the heroism that has marked many incidents, and has this to say of the Canadian at Langemarck: "There are no words to describe it. Since the affair which the United States calls the war of 1812, Canada has known no war, save minor engagements, and—like the rest of the war—against nature. The rest has been peace and nation building and prosperity. Now, the Canadian contingent is sent up to the front, and they behaved heroically. In Hill 60, to-night later, and while they still rank as 'raw troops,' the fortunes of war brought them into a position of such a sort of importance, and of such a nature, that our gas had driven back the French to their left. Their line was 'dangling in the air.' They were bombarded in front, they were encircled, they were bombarded here and there, and they were shrouded in poison fumes. They held on, they even advanced; they did the impossible by rescuing their guns from the smoke and ordered back to join up the new line.

With them, as with the others, no military decorations can possibly reward the deeds of valor. This is the key to saving the Xmas. The little men who were in bags; they had been shot through. His leg was in a splint; the bone was shattered. He was in a hospital at Xmas, and the surgeons might not exactly what had happened to a splintered skull. He managed to tell the attendants that he had received his "cure" on the ground of all, and that machine gun fire at close range did it.

What a grim underlives that statement. Shot in one hand, he kept on. His leg shattered—he kept on, until he fell unconscious from the "crack on the head." There were the five men in a certain Canadian company—and the unrecorded rest of that company.

Shrapnel Making

War Orders Set Wheels in All Parts of Canada Moving

Shrapnel making has grown to be one of the great industries of Canada. War orders have set wheels in all parts of the Dominion turning on their wheels. Within a short time every step in the process of shell making will be taken in Canada, from melting the copper, zinc and tin, to the casting of the projectiles and the shaping and assembling of the parts. Hundreds of workmen and almost two hundred establishments are already engaged at armament orders. The only exception which Canada does not carry out at present is making brass for the cartridge cases. While the zinc and copper are melted in Canada, the brass is coming here, the brass being done in the United States. In the past it has been found convenient to sell zinc and copper to the American refiners and buy back the brass copper or the two combined with tin to form brass. There has been no brass making of consequence in Canada, but the demand has been so great that there has been an investigation into the possibility of having the copper and zinc refined and brass being carried out in this country. It is the opinion of the investigator that the thing could be easily done though there might have to be the usual government assistance.

The refining operations are likely to be carried out in British Columbia where there are great deposits of copper and zinc ores, and where coal and water powers are abundant. The brass may be made there or elsewhere. It is expected that a considerable amount of outside capital will come into Canada for investment in both this and the explosive industry.

Weed Wisdom

Every Precaution is Necessary to Prevent the Spread of Weeds

When grain has grown well it is best to burn and grind it up before sowing it. When the grain that has come from stock that have been fed in pure grain he sure it is well rotted before putting it on the ground.

Never sow seed on mature stubble. Cut things on the roadsides, headlands, in waste places and in the fence corners, as well as those in the fields.

Be constantly on the watch for the appearance of new weeds. Do not wait until a weed has become established before finding out what it is. It is a comparatively easy task to get rid of a few weeds. Personnel Sot. This is a long, tedious and costly operation to clean a field which has become overrun by it.

Sow only pure seed. Impure seed is dangerous and price. Pure seed is the purchaser's right by law, and he should insist on having it.

See that the separator is cleaned before it is used on the farm, burn the refuse from the separator, and do not throw it on the manure heap.

Apply the farmyard manure—where it could be applied—to the corn, root and hay crops. By this practice even if it has some weeds in it much harm will not be done.

One authority has given the following formula for the breaking strength of Manila rope. Breaking strength equals $7 \times \text{diameter}^2$ in square inches. It gives a 13-in. diameter rope a breaking strength of 15,900 lbs.

A safe load for a single Manila rope 14 in. in diameter is 1/4 ton, and for a three-part rope 3/4 ton, and for a four-part rope, 4 tons.

Poisonous Gas

Germany Descends in Warfare to Inhuman Methods to Win Battles

The war nobly now seems to be the use of poisonous gases which all the now warring nations at the present time continue to somehow pound themselves to eschew. Whether they were judicious in so doing, and whether it is legal to make any man, or even a man that tries to shoot him with a shotgun or to batter him with a shotgun or to batter him with the butt of a musket, is irrelevant, the fact being that the normal methods of warfare are denied by mutual agreement.

It is well distinctly to understand that this agreement was made with full understanding on the part of everybody that the use of explosive shells are generally unhealthy, and that most, if not all, of the signatory nations were using picric acid explosive shells which were more than 100 times as powerful as common nitro-glycerine times. Current practice was not forbidden by the agreement at The Hague, but merely extended it by the recognition of the use of such.

This particular thing has been undertaken on a large scale by the Germans during their recent assault on the trench of Belgium.

The expected poison used seems to

have been from the reports, chlorine

gas liberates in enormous quantities

gas, following the low-lying winds

and moving towards the lines

and killing or crippling all who inhaled it.

Those not outright are doomed to slow-healing or permanent damage.

Range of Big Guns

Firing over a Score of Miles Now an Accelerated Fact

The French estimate of the distance which the Germans dropped shells on Dunkirk is 23 miles. Fire at such a range has long been a solo topic of interest as a possibility. It is now a fact.

Traveling swifter than a rifle ball, a shot fired at such a range is nearly two minutes on its way. At 45 degrees, the range is 20 miles, and two miles above the loftiest mountain, higher than man can mount in a balloon and live, before it begins to descend by mutual agreement.

It is well distinctly to understand that this agreement was made with full understanding on the part of everybody that the use of explosive shells are generally unhealthy, and that most, if not all, of the signatory nations were using picric acid explosive shells which were more than 100 times as powerful as common nitro-glycerine times.

The fire that wrecked the Antwerp was delivered with much more accurate aim, alt. vertical, at fairly short range. The great mass war is against Turkish forces from the big guns of Queen Elizabeth.

No warship could shell New York from a distance of 30 miles equaling the range of large artillery.

It is hard to hit a small mark at

LOCAL AND GENERAL

Miss Fulton spent Sunday and Monday at Pincher Creek.

Mrs. W. A. Davidson was a visitor to Calgary last week.

Mrs. Patterson, of Bellevue, is on a vacation trip to Vancouver.

Miss E. McDonald, of Cranbrook, visited her sister here.

Miss Gertie Wheatecroft, of Corbin, spent Thanksgiving Day with her parents here.

Mrs. Hodson, Sr., of Calgary, was the guest of Mrs. Jas. Scott on Thanksgiving Day.

Mrs. Rooney and daughter, of Macleod, were guests of Mrs. C. J. Stevens over Sunday.

The weather man has certainly made life just one damp thing after another this season.

Mr. Naylor, wife and family, of Bellevue, left Thursday morning for Vancouver, where they will reside in future.

The Frank mine is re-opening a shaft and a number of new families are moving into that town. Prospects are very bright for a good winter.

A harvest festival will be held in the Frank Methodist church next Sunday. The church will be appropriately decorated with grain, produce, etc. At a social to be held on Monday evening the goods used in the decorations will be offered for sale.

At the home of the bride, Coleman, on Wednesday, October 13th, Thomas Edward Morley and Mrs. Hilda Hara, both of Cranbrook, were united in marriage. The ceremony was performed by Rev. P. Naismith, of Calgary.

The report of the year's work accomplished by the local branch of the Red Cross Society, which appeared in the last issue of The Bulletin, was no doubt read with a great deal of interest by the people of Coleman. Everybody has been aware that such an organization existed in the town, but the number who realized in any sort of an intelligent manner just what work was being done—or how much—could, it is safe to assert, be counted on one's fingers. Not that the people are at all out of sympathy with the work, but Coleman is just like any other town in that the willing worker always finds plenty of people who are willing to let him or her do the work, and so it has fallen to the lot of a small band of faithful women workers to carry on the local Red Cross work. Speaking with strict candor, it is perhaps just as well for the work's sake that it has been so. And while the ladies have done most or all of the work, The Bulletin is quite sure their splendid efforts are appreciated by every resident of the community. Mrs. Goodeve makes an unusually efficient and attentive secretary, and special mention should also be made of the work and time spent on Red Cross work by Mrs. A. W. McLeod. The local branch can use any number of active workers, and it might be well for Bulletin readers to bear this general reminder in mind.

Justice! What does that mean anyway? Up in the Wetaskiwin district a woman has been sentenced to death for shooting another woman with whom her husband was living in open shame. It matters not apparently that the man (?) had wrecked his wife's life, his home, and everything which most people hold dear; nor did it matter at all that he had brought his paramour into his own home, in open defiance of every law of common decency which man knows, thereby creating a situation that must have just as great a deteriorating influence on the community, and on that organization which we are prone to call "society", as did the act of woman in destroying the peculiar species of human vermin that had invaded the sanctity of her home. The man was the cause of the trouble; he it was who by lowering himself to the level of the brute beast destroyed his home; yet, because his wife, whom he had sworn to cherish and love, destroyed the invader of her home, she must herself die. The Bulletin has no doubt but that the judge's sentence was in exact accord with the evidence submitted, but it is only in accord in a cold-blooded and strictly legal sense. It lacks entirely that human equation we hear so much about these days. And it is nothing to the credit or glory of any country that a man

or woman can openly do as this man and his neighbor's wife have done, and that there is no law on the statute books to say them nay. Such incidents as this make it almost easy to catch the line of vision of the man who declared that "The law is an ass."

The report of the Coleman school for September will appear in this paper next week.

The Harvest Thanksgiving services at St. Albans conducted by Rev. Herbert Clay, were very successful. The little church was beautifully decorated by the W. A. with corn, fruit and flowers, and was filled up at the evening service to overflowing.

The social on Monday evening was also a great success. The programme was contributed to by Messrs. Clay, Clark, Gladys Crawford, and several young ladies of Mrs. Frank Graham's Bible Class, who put on a sketch entitled, "The Scrubtown Sewing Circle." The sketch was well staged and great credit is due to Mrs. Graham for her energetic management. The acting was real good, and the laughter long and continuous. The Misses Parry, Deugau, Grafton, Crawford, Johnson, and Ostrander participated in the sketch. Another great feature was the musical flag drill display, conducted also by Mrs. Frank Graham. These items would be a big attraction in any place. The sum of \$7.40 was collected for the Red Cross Society.

On the Field of Honor

The publisher of the Family Herald Weekly Star, Montreal, are making a strong bid for that beautiful picture, full of pathos, entitled "On the Field of Honor." It is assumed that the publishers of the Family Herald have in mind using it as a presentation plate.

If that is so there is a great treat in store for readers of "The Family Herald and Weekly Star" this autumn. In past years The Family Herald of Montreal has been noted not only for the wonderful excellencies of that journal but for many beautiful pictures it has presented to its readers. The Family Herald has a name for succeeding in anything it undertakes, and we feel sure if it is humanly possible to secure "On the Field of Honor" that the publishers will succeed in getting it. "On the Field of Honor" is attracting wide-spread attention in Europe.

SALVATION ARMY.

An enrolment of soldiers will take place in the S. A. hall on Sunday next, October 17th. This being the first enrolment in the S. A. in Coleman, a special invitation is extended to all, and every interesting meeting is promised, commencing at 7:30.

Our meetings as usual next Thursday, juniors 7 to 8 and seniors from 8 to 9 o'clock; Saturday, seniors from 8 to 9 o'clock; Sunday, 11 a. m. and 2:30 and 7:30 p. m.

High Mass is held in Holy Ghost church every Sunday at 11 a. m., Sunday school at 2:30 and Vespers at 7:30. Rev. Father Crociata is also in charge of St. Anne's church, Blairmore, where High Mass is held at 9:30, with Benediction immediately after, and Sunday school at 3 o'clock.

COAL

The use of International Slope Coal means fuel economy.

When you want a good fire a poor coal is a useless and expensive fuel.

Try International Slope and see if it will not give you satisfaction.

IT BURNS, IT HEATS.

OWNS AND OPERATES

Carbondale Mine

WHICH PRODUCES AN

Exceptionally High Grade

OF

STEAM COAL

A SQUARE MEAL

When one is fatigued and hungry and tired out — completely "bushed" — nothing in this world affords more genuine pleasure and satisfaction than a good substantial meal. We all know how true this is. Also, we all know that one of the essentials of a good meal is Good Meat. Get one of our Beef Roasts at 18c per pound. We guarantee the quality. Or if you prefer Cold Meat, just try our Cooked Ham or Jellied Tongue.

The weather is too hot for a window display, but come in and see what we have.
